

WHAT IS CLAIMED IS:

1. Goggles comprising a hard lens
portion, an upper soft protective member and
5 two temples to be supported on the ears of a
wearer, said upper soft protective member
fixed with an upper edge of said lens portion,
said temples combined with two ends of said
lens portion; an extension member extending
10 outward from the two ends of said lens portion,
said extension members respectively having an
upper flat combine member, said upper flat
combine member having a hook hole, said lens
portion having plural hook grooves each with
15 an upper opening formed in the upper edge,
said upper protective member having a
projection in two ends of a shield portion
extending rearward, said projections fitting in
said hook holes of said extension members of
20 said lens portion, said upper protective
member having plural projections
corresponding and fitting with said plural hook
grooves of said lens portion, thus said upper

protective member assembled with said lens portion to become goggles convenient and comfortable to wear.

2. The goggles as claimed in Claim 1,
5 wherein said upper protective member has an elongate groove to fit with the upper edge of said lens portion.

3. The goggles as claimed in Claim 1,
wherein a lower soft protective member is
10 additionally provided to be combined with a lower edge of said lens portion.

4. The goggles as claimed in Claim 3,
wherein said two extension members of said lens portion have a flat combine member in a
15 lower edge, and a hook hole in said combine member, said lens portion having two hook grooves at two sides of a center recess corresponding to a nose of a wearer, said lower protective member having a projection at two
20 ends to fit in said hook holes of said lens portion, said lower protective member having two projections in an intermediate portion corresponding and fit with said hook grooves

of said lens portion so as to combine said lens portion with said lower protective member stably.

5 5. The goggles as claimed in Claim 4, wherein said lower protective member has an elongate groove to fit with the lower edge of said lens portion.

10 6. The goggles as claimed in Claim 1, wherein said lens portion has its intermediate section corresponding to a nose provided with a nose pad.

15 7. The goggles as claimed in Claim 6, wherein said lens portion has projections at two sides of the section corresponding to the nose of a wearer, and said nose pad has plural holes in a front side for said projections of said lens portion to fit with so as to stabilize said nose pad with said lens portion.
